The screenshot shows the GitHub interface for the repository 'sungbin5304 / Kotlin2JavaScript'. The top navigation bar includes links for Code, Issues, Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. Below this, there are tabs for 'master' (selected), '1 branch', and '0 tags'. A green button labeled 'Go to file' is visible. The main content area displays a commit history table with columns for the commit icon, message, author, time ago, and number of commits. The first commit is titled 'Add arguments' by user 'sungbin5304' at '11 days ago' with '6 commits'. The second commit is 'Initial commit' also by 'sungbin5304' at '12 days ago'. The third commit is 'Update README.md' by 'sungbin' at '12 days ago'. The fourth commit is 'kt2js.js' by 'sungbin' at '11 days ago'. The fifth commit is 'kt2js.png' by 'sungbin' at '12 days ago'. The sixth commit is 'kt2js_preview.png' by 'sungbin' at '12 days ago'. On the right side, there's a sidebar with 'About' section mentioning 'Kotlin's grammar convert to JavaScript', a 'Readme' link, and 'Apache-2.0 License'. At the bottom, there's a 'Languages' section.

<https://github.com/sungbin5304/Kotlin2JavaScript>

주기적으로 업데이트 예정.
