깃허브 웹훅 봇

Violet 카페스탭1:1 채팅2020.02.05. 02:35조회 235

□ 첨부파일 1

대충 깃허브 웹훅을 통해 푸시 이벤트를 받아오는 봇입니다.

스크립트 액티비티도 구현되어 있으니 참고하세요.

const scriptName = "GitHubWebhook";

웹훅 구축에 필요한 과정 (포트포워딩, 깃허브에서 웹훅 등록 등)은 여기에서 설명하지 않습니다.

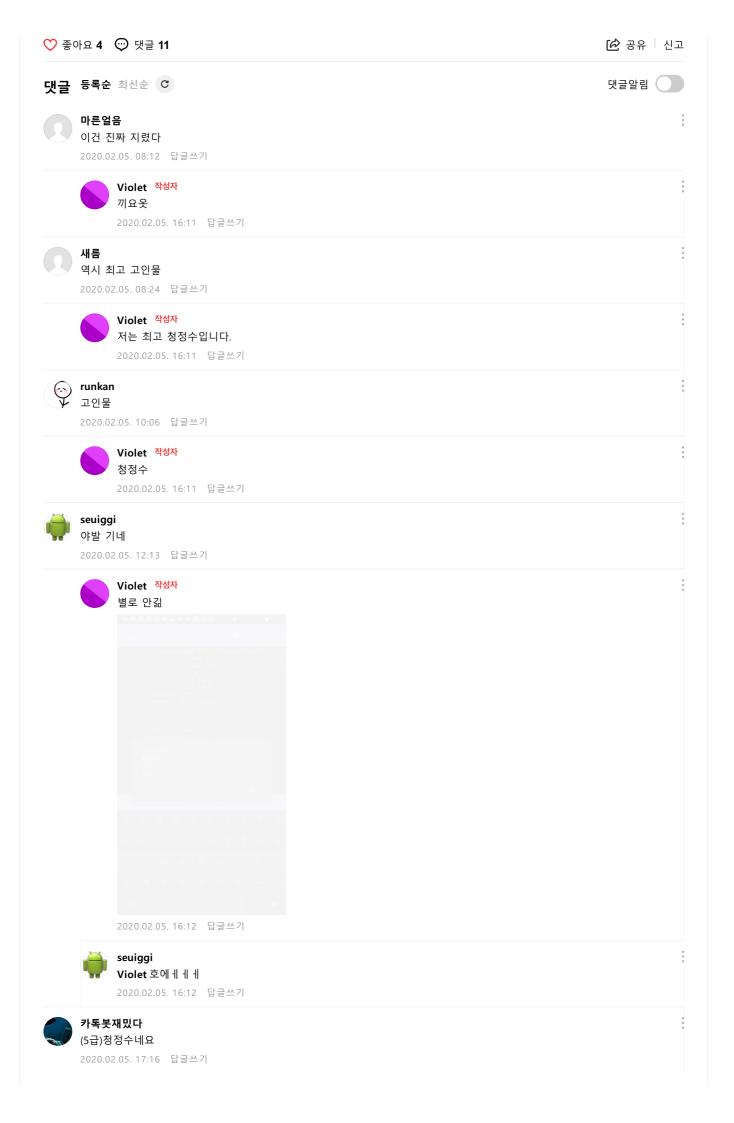

들여쓰기가 잘 된 버전을 원하신다면 첨부파일을 다운받으세요. (모바일이라 소스코드 뷰 넣기가...)

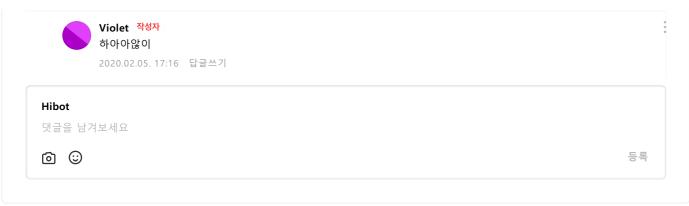

```
importPackage(java.io);
importPackage(java.net);
importPackage(org.json);
importClass(java.lang.Thread);
importClass(java.lang.Runnable);
